Forecast for Wednesday 08 Sep 2021

Weather: Dry with clear spells overnight. After a dry and bright start, it will turn increasingly cloudy from the south. Some sunny spells still possible around the middle of the day, but gradually becoming less frequent into the afternoon. Despite a drop in temperatures, it will still feel rather warm and humid. Into the evening there is a risk of showers reaching the south of the area associated with a very low risk of thunder.

Chance of cloud free mountain/hill tops above 600m: 70% chance or better throughout the day.

Visibility: Good throughout, with cloud remaining above the hills.

Forecast for Thursday 09 Sep 2021

Weather: A largely cloudy start to Thursday and quickly becoming unsettled, with showers passing over the park. These could be heavy at times with an increasing risk of thunderstorms from late morning and into the afternoon. The showers will ease off into the evening and night, but skies will remain cloudy.

Maximum wind: Winds on the peaks southerly 12mph, gusting 22mph.

Chance of cloud free mountain/hill tops above 600m: 80% in the very early hours, but dropping to 40% as the showers pass over during the day.

Visibility: Good outside of any rain, but quickly dropping in the showers and being poor in the heaviest showers and thunderstorms. Cloud bases above the summits to start the day, but falling to 200-300m in association with the showers and obscuring many paths and slopes.

Temperature: **Valleys:** Plus 15 Celsius, rising to plus 20 Celsius.

At 600m: Plus 13 Celsius.

Freezing level: Above the summits
